

# Have You Preplanned Your final Needs?

---

Dear Baby Boomer (50+),

When you request information, you've taken the right first step in protecting your assets and family from the high cost of unexpected medical and final expenses.

You have automobile insurance to protect yourself in case of a collision! Health care in case you get sick or hurt. But, how would you pay for long term care and final expenses? When you die, how will you want your final needs taken care of? Do you want cremation or a traditional burial? Do you want a viewing for family and friends or do you want a Going Home celebration? Do you want a special memorialization? All of these questions can be answered and your wishes honored in advance when you can make decision with a clear mind. With proper advance planning you can be guaranteed today's prices regardless of when time of need arrives – 10 to 15 years (plus) from now!

Please take a moment right now to give us a call so we can spend some time to show you how you can protect your family and hard earned income from these increasing expenses. It is not whether you want this expense! It is already decided – it is when you have to make this expense!

**Medicaid planning** services are available and included these benefits.

- Local professional service providers
- Easy qualification for 100% funding and all plans are fully insured

- Single one-time payment or 3, 4, 10 year pay plan options
- Your monies are protected from risk and Medicaid if necessary
